TUMBLE WINDMILL GRASS
*Chloris verticillata* Nutt.
Plant Symbol = CHVE2

*Contributed By: USDA NRCS National Plant Data Center*

**Description**
Grass Family (Poaceae). Tumble windmill grass is a native, warm-season, perennial bunch grass. The height ranges from 4 to 12 inches. The leaf blade is crowded at the base, 3 to 7 inches long, tightly folded, abruptly pointed, and light green. The leaf sheath is shorter than the internodes, compressed, and flattened. The stem is erect or decumbent and sometimes roots at the lower nodes. The seedhead has 7 to 10 slender spikes, 2 to 6 inches long, arranged in 1 to 3 whorls, finally widely spreading, and each spikelet is tipped with a short awn.

**Distribution**: For current distribution, please consult the Plant Profile page for this species on the PLANTS Web site.

**Management**
If grazed during dormancy, supplement with protein and mineral concentrates. Its quality is moderately high, but production is low. It is not a choice forage plant, but is important as an indicator of fair to poor range condition. This grass is seldom, if ever, a key management species. When it is, it responds to proper grazing use and deferred grazing periods of 50 to 60 days.

**Establishment**
Growth starts in spring and it becomes dormant in the fall. It may produce two seed crops during the growing season, the first from May to July and then the second in September. The seedheads break off at maturity and tumble in the wind. It is adapted to a wide range of soils, though it is best adapted to acid to neutral medium- and coarse-textured soils.

**Cultivars, Improved and Selected Materials (and area of origin)**
Please contact your local NRCS Field Office.

---

Alternate Name
Tumble finger grass, windmill grass, tumble windmillgrass.

Uses
All livestock graze tumble windmill grass in spring and early summer.

Status
Please consult the PLANTS Web site and your State Department of Natural Resources for this plant’s current status, such as, state noxious status and wetland indicator values.
For more information about this and other plants, please contact your local NRCS field office or Conservation District, and visit the PLANTS Web site [http://plants.usda.gov] or the Plant Materials Program Web site [http://Plant-Materials.nrcs.usda.gov]

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, sex, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at 202-720-2600 (voice and TDD).

To file a complaint of discrimination write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 14th and Independence Avenue, SW, Washington, DC 20250-9410 or call 202-720-5964 (voice or TDD). USDA is an equal opportunity provider and employer.
